

2019 Annual Symposium on Geology of Brazil and China

August 12-25, 2019 @ São Paulo
(First Circular)

Institute of Geosciences, University of São Paulo

About the symposium

The annual symposium on Geology of Brazil and China (ASGBC) occurs each year in China and Brazil by turns. The symposium aims at better understanding of the geological evolution of the São Francisco and the North China Craton to bring new constraints on the paleogeographic reconstruction of the Columbia and Rodinia supercontinents. The 2019 China-Brazil annual minisymposium will be held in Brazil on 12-25 August. It will include a one-day meeting in Sao Paulo and a 13-day-field trip along the Mineiro Belt, Quadrilátero Ferrífero and Southern São Francisco Craton and its western margin.
